SOUND MIND, SOUND BODY™

At ASICS, we believe in the positive impact of sport on the mind. Take our name, an acronym for Anima Sana in Corpore Sano or “a sound mind in a sound body.” Our founding philosophy is perhaps more relevant than ever and we’re recommitting to promoting the positive, uplifting power of sport.

GEL-KAYANO® 30

From 5Ks to full marathons, the GEL-KAYANO® 30 shoe is designed to provide advanced stability and cushioning properties.
The new 4D GUIDANCE SYSTEM™ helps provide adaptive stability. Placed on the inside of the midsole, this adaptive foam helps reposition your arch after each impact for a more supportive stride.

We also updated the midsole with FF BLAST™ PLUS ECO cushioning. With approx. 24% bio-based content, this material helps create cloud-like softness in every step.

PureGEL™ technology is strategically positioned below the heel and is 65% softer than standard GEL® technology. Now you can make your distance training feel surprisingly smooth.

FEATURES

Engineered stretch knit upper improves breathability
External heel counter helps keep the foot stable and provide a more comfortable stride 4D GUIDANCE SYSTEM™ feature helps create adaptive stability for a more balanced stride
Rearfoot PureGEL™ technology improves impact absorption and creates a softer feeling at footstrike FF BLAST™ PLUS ECO cushioning is made with approx. 24% bio-based content and helps provide cloud-like comfort
OrthoLite™ X-55 sockliner improves comfort Reflective details improve visibility
AHARPLUS™ heel plug improves the outsole durability
At least 70% of the shoe's main upper material is made with recycled materials to reduce waste and carbon emissions
The sockliner is produced with the solution dyeing process that reduces water usage by approximately 33% and carbon emissions by approximately 45% compared to the conventional dyeing technology

FF Blast+

GT-2000™ 12

The GT-2000™ 12 shoe is a versatile stability trainer that's functional for various distances. We've reimagined this workhorse running style with less weight and a smoother heel-to-toe transition.

The midsole is updated with a full-length FF BLAST™ PLUS cushioning unit and PureGEL™ technology. These features help provide a more energized toe-off with cloud-like softness underfoot.

Meanwhile, the 3D GUIDANCE SYSTEM™ consists of wider basenets and an increased heel bevel and forefoot flare. As a result, you'll experience a silky-smooth transition from footstrike to toe-off.

FEATURES

Jacquard mesh upper offers a supportive and comfortable foothold
At least 50% of the shoe's main upper material is made with recycled content to reduce waste and carbon emissions
The sockliner is produced with the solution dyeing process that reduces water usage by approximately 33% and carbon emissions by approximately 45% compared to the conventional dyeing technology 3D GUIDANCE SYSTEM™ helps provide advanced stability for a smoother stride
Rearfoot PureGEL™ technology improves impact absorption and creates a softer feeling at footstrike FF BLAST™ PLUS cushioning provides lightweight impact absorption and a responsive rebound
3D GUIDANCE SYSTEM™ helps provide advanced stability for a smoother stride OrthoLite™ X-30 sockliner provides soft step-in comfort
AHARPLUS™ heel plug rubber helps improve durability
AHAR® LOW DENSITY outsole material helps improve resistance against wear
ASICS LITE rubber is lighter and stronger than standard outsole rubbers. Bio-based cellulose nanofiber is also partially used
Reflective details are designed to improve visibility in low-light settings

GT-2000 12
PureGEL
FF Blast+

GT-2000™ 11

The GT-2000™ 11 shoe is a versatile stability trainer that's functional for various distances. We've updated the underfoot cushioning to make it feel more comfortable and energetic.

Key adjustments in the midsole include our FF BLAST™ cushioning. This soft material helps promote softer landings and a responsive rebound.
LITETRUSS™ technology is positioned on the inside of the midsole to improve stability. It helps prevent your foot from rolling too far inward, setting you up for a smoother stride.

FEATURES

Jacquard mesh upper offers a supportive and comfortable foothold
At least 50% of the shoe's main upper material is made with recycled content to reduce waste and carbon emissions
The sockliner is produced with the solution dyeing process that reduces water usage by approximately 33% and carbon emissions by approximately 45% compared to the conventional dyeing technology
Rearfoot GEL® technology improves impact absorption and creates a softer feeling at footstrike
FF BLAST™ technology provides lightweight cushioning and a responsive rebound FLYTEFOAM® cushioning helps keep the shoe lightweight
LITETRUSS™ technology improves medial support and midfoot integrity OrthoLite™ X-30 sockliner provides soft step-in comfort
AHARPLUS™ heel plug rubber helps improve durability
ASICS LITE rubber is lighter and stronger than standard outsole rubbers. Bio-based cellulose nanofiber is also partially used

GT-1000™ 12

Our approach for the GT-1000™ 12 shoe was to modernize the shape and make it more comfortable. It's designed for an active lifestyle and is functional for running or wearing it to the gym.

The shoe is reimagined with a soft mesh upper, a new heel shape, and a more comfortable sockliner. These features are also met with a tongue wing construction that helps provide a more supportive fit.

LITETRUSS™ technology is placed on the midsole's inside angle to reduce pronation. It helps produce a more supportive stride while keeping overpronation at bay.

FEATURES

Engineered mesh upper improves breathability and wraps the foot with a soft feel Tongue wing construction helps create a more supportive fit
External heel counter improves the fit and helps increase stability
LITETRUSS™ technology improves medial support and midfoot integrity FLYTEFOAM® cushioning provides lightweight impact absorption
Rearfoot GEL® technology improves impact absorption and creates a softer feeling at footstrike
OrthoLite™ X-30 sockliner provides soft step-in comfort

GT-4000™ 3

The GT-4000™ 3 shoe is one of the most stable shoes in the ASICS running collection. Featuring a softer and smoother design, this shoe is functional for over-pronators seeking a more supportive and cushioned step.

The mesh upper is engineered with a 3D print that eliminates the need for traditional overlays. Its brushed texture creates a softer feel to improve comfort, while providing advanced airflow. A 3D SPACE CONSTRUCTION™ feature allows you to experience a softer feel underfoot.

Meanwhile, the LITETRUSS™ midsole technology improves stability, creating a smoother and more balanced stride.

FEATURES

Engineered mesh upper Improves breathability and wraps the foot with a soft feel 3D SPACE CONSTRUCTION™ Technology Improves compression at footstrike LITETRUSS™ Technology Improves medial support and midfoot integrity FLYTEFOAM™ Propel technology Cushioning increases impact absorption and responsiveness
Rearfoot and forefoot GEL™ technology Improves impact absorption and creates a softer feeling at footstrike
OrthoLite™ X-30 Sockliner Provides soft step-in comfort
Full-ground contact design. Creates a smoother and more efficient ride

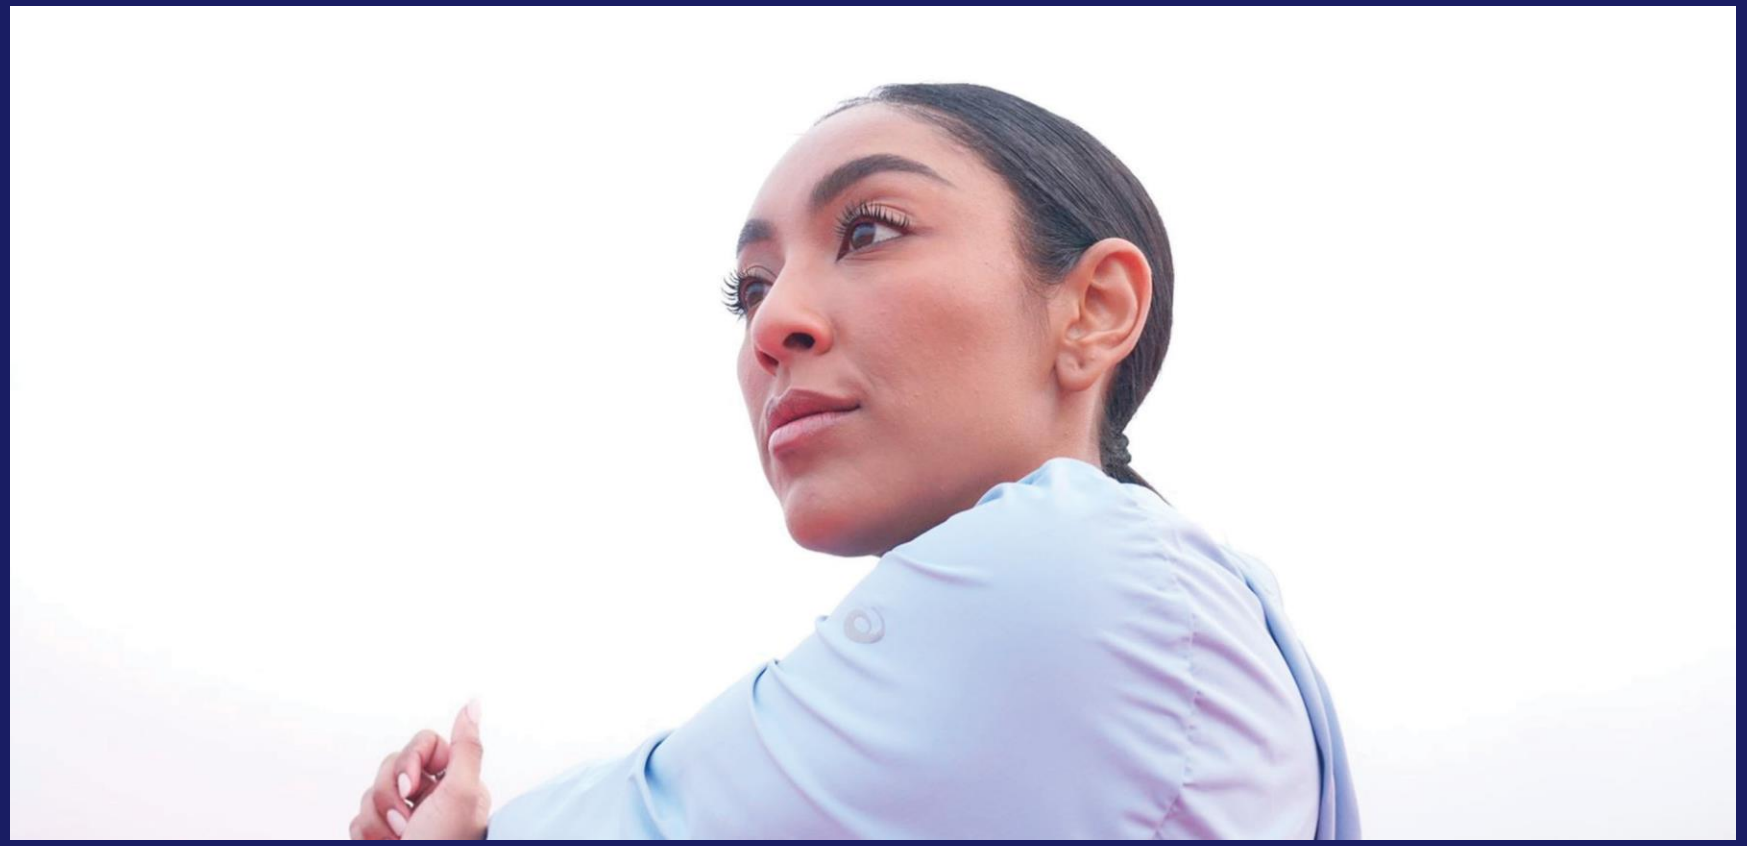
CUSHION



FOOTWEAR

GEL-KINSEI® MAX

The GEL-KINSEI® MAX trainer takes the experience of running on clouds to the next level. It's been redesigned for runners who want every step to feel like it's oozing with softness.

The tooling is modified with our FF BLAST™ PLUS ECO cushioning for the midsole's top layer. This helps provide cloud-like comfort while creating an energized feel at toe-off.

A TPU midsole plate is positioned in the center of the midsole to provide a more dynamic toe-off. It also works in tandem with the new rubber foaming and HYBRID GEL™ technology to help create smoother underfoot transitions.

FEATURES

Engineered mesh upper improves airflow to help your feet keep cool
At least 20% of the shoe's main upper material is made with recycled content to reduce waste and carbon emissions
The sockliner is produced with the solution dyeing process that reduces water usage by approximately 33% and carbon emissions by approximately 45% compared to the conventional dyeing technology
TPU propulsion plate helps redirect the runner's energy forward and create a faster feel FF BLAST™ cushioning provides lightweight impact absorption and a responsive rebound FF BLAST™ PLUS ECO cushioning is made with approx. 24% bio-based content and helps provide cloud-like comfort
Rearfoot and forefoot GEL® technology improves impact absorption and creates a softer feeling at footstrike
E.V.A sockliner offers soft step-in comfort
Reflective details are designed to improve visibility in low-light conditions Strategic outsole engineering improves grip and durability
AHARPLUS™ heel plug improves durability

GEL-NIMBUS® 25

The GEL-NIMBUS® 25 shoe's soft cushioning properties help you feel like you're landing on clouds. This neutral trainer is revamped with new materials that create a softer and smoother running experience.

A soft engineered knit upper comfortably wraps your foot while supplying advanced ventilation. Its updated knit collar construction provides better flexibility and extends around the ankle for a more luxurious fit and feel.

The midsole is packed with the most cushioning that the series has offered to date. By using FF BLAST™ PLUS ECO cushioning, this trainer creates a lighter and softer cushioning experience with less of an impact on the environment.

FEATURES

Engineered knit upper wraps the foot with a soft feel while improving breathability
At least 75% of the shoe's main upper material is made with recycled content to reduce waste and carbon emissions
The sockliner is produced with the solution dyeing process that reduces water usage by approximately 33% and carbon emissions by approximately 45% compared to the conventional dyeing technology

GEL-CUMULUS® 25

Experience a softer feel underfoot with the GEL-CUMULUS® 25 shoe. This neutral everyday trainer is a versatile choice for various running workouts and distances.
We've updated the midsole with our new PureGEL™ technology and FF BLAST™ PLUS cushioning. These materials help create softer landings and a more energized toe-off during your training.

FEATURES

FF BLAST™ PLUS cushioning provides lightweight impact absorption and a responsive rebound
PureGEL™ technology helps provide lightweight cushioning and softer landings Engineered jacquard mesh upper helps improve breathability and comfort
The sockliner is produced with the solution dyeing process that reduces water usage by approximately 33% and carbon emissions by approximately 45% compared to the conventional dyeing technology
Reflective details are designed to improve visibility in low-light conditions
At least 75% of the shoe's main upper material is made with recycled content to reduce waste and carbon emissions
OrthoLite™ X-30 sockliner provides soft step-in comfort
Full-ground contact design creates a smoother and more efficient ride AHAR® outsole rubber improves durability

BOUNCE

FOOTWEAR

SUPERBLAST™

The SUPERBLAST™ shoe is the newest hero of the BLAST series. It creates a lightweight and responsive ride that makes it functional for long runs, tempo runs, and everything in between.

This shoe's upper construction features an asymmetric mesh design. It features different colors on the medial and lateral angles of the shoe for visual interest.
The midsole features a combination of FF BLAST™ PLUS and FF BLAST™ TURBO cushioning. Also used in our METASPEED™ racing models, this foam helps creates one of the lightest and bounciest running experiences.

FEATURES

Jacquard woven upper material improves airflow to help your feet keep cool The heel stabilizer helps support the foot and create a more balanced stride
Gusseted tongue wing fit system improves the midfoot fit and reduces tongue sliding FF BLAST TURBO™ cushioning improves compression and creates a responsive feel underfoot
FF BLAST™ PLUS cushioning provides lightweight impact absorption and a responsive rebound
Trampoline-inspired outsole design provides a more responsive bounce back AHARPLUS™ outsole rubber improves the outsole durability
The sockliner is produced with the solution dyeing process that reduces water usage by approximately 33% and carbon emissions by approximately 45% compared to the conventional dyeing technology
Reflective details are designed to improve visibility in low-light settings

NOVABLAST™ 3

The NOVABLAST™ 3 running shoe draws inspiration from a geometric origami feature for the upper and midsole. After making the shoe approx. 30g lighter than the previous version, we also equipped this style with improved comfort.

A tongue wing construction in the upper helps improve the fit while reducing tongue movement. This component is reinforced with a more supportive heel design to help guide the foot with more control through your gait cycle.

Meanwhile, the midsole's FF BLAST™ PLUS cushioning helps create a lighter and more responsive feel underfoot.

FEATURES

Jacquard mesh upper provides good comfort and support while keeping feet cool The heel stabilizer helps support the foot and create a more balanced stride Gusseted tongue wing fit system improves the midfoot fit and reduces tongue sliding
FF BLAST™ PLUS cushioning provides lightweight impact absorption and a responsive rebound
Trampoline-inspired outsole design provides a more responsive bounce back AHAR® outsole improves durability

DYNABLAST™ 3

The DYNABLAST™ 3 shoe is designed for the fitness enthusiast seeking a comfortable offering for their run or training routine.
A soft, engineered knit improves the shoe's fit, comfort, and breathability. This material is also reinforced with a notched tongue construction that helps reduce pressure points over the in-step.

The FLYTEFOAM™ BLAST cushioning's energized softness provides a trampoline effect as you run. It helps create a smooth yet responsive feeling underfoot.

FEATURES

Engineered knit upper improves breathability
FLYTEFOAM® BLAST technology provides lightweight cushioning and a responsive rebound Underfoot cutouts provide excellent bounce
OrthoLite™ X-30 sockliner provides soft step-in comfort AHARPLUS™ outsole rubber improves durability
At least 50% of the shoe's main upper material is made with recycled materials to reduce waste and carbon emissions
The sockliner is produced with the solution dyeing process that reduces water usage by approximately 33% and carbon emissions by approximately 45% compared to the conventional dyeing technology

SPEED

FOOTWEA
R

METASPEED™ EDGE+

The METASPEED™ EDGE+ racing shoes are designed for cadence-style runners who are looking to start fast and finish faster. Runners wearing these shoes will be able to take longer strides while conserving energy with each step.

Thanks to an energetic midsole foam and a propulsive carbon plate, runners wearing these shoes will be able to conserve more energy while maintaining their pace at the later stages of the race.

METASPEED™ SKY+

The METASPEED™ SKY+ racing shoes are designed for stride-style runners who are looking to start fast and finish faster. Runners wearing these shoes will be able to take longer strides while conserving energy with each step.

Thanks to an energetic midsole foam and a propulsive carbon plate, runners wearing these shoes will be a ble to conserve more energy while maintaining their pace at the later stages of the race.

FEATURES

Jacquard mesh upper improves breathability
FF BLAST™ TURBO cushioning improves compression and creates a responsive feel underfoot
Curved sole design helps runners conserve more energy in each step
Carbon plate guides your foot throughout your step and propels your foot forward ASICSGRIP™ outsole rubber improves durability and grip
At least 50% of the shoe's main upper material is made with recycled content to reduce waste and carbon emissions
The sockliner is produced with the solution dyeing process that reduces water usage by approximately 33% and carbon emissions by approximately 45% compared to the conventional dyeing technology

MAGIC SPEED™ 3

The MAGIC SPEED™ 3 shoe is designed to support your racing goals. In addition to the softer cushioning experience, this shoe helps create better stability throughout your stride.

A full-length Pebax propulsion plate is sandwiched in the midsole to propel your foot forward. This helps create a smoother and more propulsive experience during the toe-off phase of your stride.

Both layers of the midsole are reconstructed with FF BLAST™ PLUS cushioning. This makes the ride feel bouncier and more energetic during tempo runs and races.

FEATURES

Engineered mesh upper improves breathability
At least 50% of the shoe's main upper material is made with recycled materials to reduce waste and carbon emissions
The sockliner is produced with the solution dyeing process that reduces water usage by approximately 33% and carbon emissions by approximately 45% compared to the conventional dyeing technology
Full-length PEBAX® propulsion plate adds structure and improve toe-off propulsion
FF BLAST™ PLUS cushioning provides lightweight impact absorption and a responsive rebound ASICSGRIP™ rubber outsole improves traction

HYPER SPEED™ 3

The HYPER SPEED™ 3 shoe is designed to complement your training and racing routine. This version includes a modified upper construction that's met with various customizable features.

The shoe's jacquard mesh material is designed to improve breathability so your feet can keep cool and comfortable during your run.
Holes in the eyestay decreased from 18 to 16, which helps provide a more balanced fit that's easier to customize. Meanwhile, an elastic lace component is positioned on top of the tongue to create better lace support.

FEATURES

Jacquard mesh upper for breathability
FLYTEFOAM® cushioning provides lightweight impact absorption AHAR® outsole improves durability
The sockliner is produced with the solution dyeing process that reduces water usage by approximately 33% and carbon emissions by approximately 45% compared to the conventional dyeing technology

NOOSA TRI™ 15

The NOOSA TRI™ 15 shoe features an Avant Garde approach that's inspired by Van Gogh paintings. As always, the shoe is designed to stand out from a visual and underfoot comfort perspective.

Bold colors and patterns on the engineered mesh upper are met with tongue pull-tabs and toggled laces that make the shoes easier to put on and take off. This makes it easier to transition between different stages of a triathlon.

We updated the midsole with a full-length FF BLAST™ cushioning unit to create lightweight impact absorption underfoot. Additionally, we added 1mm of foam for a more forgiving landing and a smoother ride.

FEATURES

FLYTEFOAM™ cushioning provides lightweight impact absorption and a responsive rebound GUIDESOLE® technology helps conserve energy by reducing ankle flexion
Engineered mesh upper improves breathability AHARPLUS™ outsole improves durability
Sockliner is produced with a solution dyeing process that reduces water usage and carbon emissions
Full-ground contact design creates a smoother and more efficient ride Toggled laces make it easier to personalize the shoe's fit

METASPEED™ SP | METASPEED™ MD

The METASPEED™ SP spike helps sprinters take longer strides with less effort.
Formed with FF BLAST TURBO™ cushioning, this shoe allows you to experience a more responsive rebound at toe-off. It's teamed with a carbon plate that catapults you forward with an extended stride length.

The outsole's spike configuration is designed to increase traction. It helps create advanced grip without causing too much resistance with the track's surface.

FEATURES

FF BLAST TURBO™ cushioning improves compression and creates a responsive feel underfoot
Carbon plate guides your foot throughout your step and propels your foot forward MOTION WRAP™ upper improves breathability and helps provide a supportive fit

TRAIL

FOOTWEA
R

TRABUCO™ MAX 2

The TRABUCO™ MAX 2 shoe draws inspiration from the concept of technology and how it can be synchronized with nature to free the mind and body. It continues to provide advanced energy savings and cushioning properties to help you navigate the trails with less effort.

FF BLAST™ PLUS technology has been added to the midsole to create effortless impact absorption while propelling your momentum forward.
This material also creates a more dynamic feel that helps keep the shoe lightweight. GUIDESOLE® technology is strategically positioned to create an easy forward roll. Additionally, it's scientifically proven to help increase your potential to run further while using less energy.

FEATURES

GUIDESOLE® technology helps conserve energy
FF BLAST™ PLUS cushioning creates a softer landing and a more responsive toe-off ASICSGRIP™ outsole improves durability
ORTHOLITE™ insole provides soft step-in comfort Breathable mesh upper
Gaiter system
3D print upper improves support Toggled speed lacing system

GEL-TRABUCO® 11

The GEL-TRABUCO® 11 shoe is a versatile trail style that offers adaptive stability with less weight. It's also reimagined with better traction for the trails.
An adaptive guidance system and wide basenets help create a more stable ride on varying terrain. They're functional for when you need extra support during the later stages of your outdoor excursion.

Its updated rock protection plate features a flexible construction that shields your feet from sharp rocks and rugged terrain. We also added 2mm to the foam's stack height to improve comfort and impact absorption.

The outsole is formed with a revamped ASICSGRIP™ technology. This material helps you experience better traction on varying off-road surfaces.

FEATURES

Engineered mesh upper helps improve breathability
At least 50% of the shoe's main upper material is made with recycled materials to reduce waste and carbon emissions
The sockliner is produced with the solution dyeing process that reduces water usage by approximately 33% and carbon emissions by approximately 45% compared to the conventional dyeing technology
Adaptive guidance system helps create a more stable ride on varying terrain Lace garage helps keep the laces from coming untied
Rearfoot GEL® technology improves impact absorption and creates a softer feeling at footstrike
FF BLAST™ cushioning creates a softer landing and a more responsive toe-off
Rock protection plate features a flexible design that helps shield your foot from rocks and rugged terrain
Reflective details are designed to improve visibility in low-light conditions ASICSGRIP™ outsole rubber provides advanced grip on varying terrain Full-ground contact design creates a smoother and more efficient ride

FUJI LITE™ 4

The FUJI LITE™ 4 shoe provides advanced grip to give you the confidence to go fast on the trails.
FLYTEFOAM™ cushioning is positioned in the midsole to help provide lightweight impact absorption to keep your feet comfortable on varying terrain.
Its modified outsole design is reimagined with a lighter construction and better grip. These updates help you experience better traction on uneven terrain with wet conditions.

Lastly, the upper material is constructed with fewer resources and recycled components to support a more sustainable manufacturing.

FEATURES

Engineered mesh upper improves breathability
At least 50% of the shoe's main upper material is made with recycled materials to reduce waste and carbon emissions
The sockliner is produced with the solution dyeing process that reduces water usage by approximately 33% and carbon emissions by approximately 45% compared to the conventional dyeing technology
Reflective details help improve visibility
Lace garage tongue feature allows the wearer to tuck in their laces, so they don't come untied or snag anything when they're running
FLYTEFOAM™ cushioning consists of cellulose nanofiber, a bio-based material applied as a component of this shoe's midsole
ASICSGRIP™ outsole helps runners experience better traction and durability on wet and dry trail surfaces

CONTEND® 8 TS

The CONTEND™ 8 TS (Toddler Size) SCHOOL YARD shoe is designed for young feet. Each shoe in the collection features a hook and loop fastening system that helps keep feet stabilized. Details like the toecap and solid rubber outsole increase durability and lengthen the shoe's lifespan. Additionally, our CUB MATCH™ sockliner is printed with a tiger caricature that helps kids identify the right and left shoe.

FEATURES

Hook and loop fastening system
CUB MATCH™ sockliner uses a tiger graphic to help kids recognize the left shoe from the right shoe
The toecap and solid rubber outsole improve durability
At least 20% of the upper's material is made with recycled polyester
The sockliner is produced with the solution dyeing process that reduces water usage by approximately 33% and carbon emissions by approximately 45% compared to the conventional dyeing technology
